

**Sale Name:** Superior Genetics Annual Kiko Sale 2021

**LOT 5 - PJM High Regard/ Legacy K22 - AKGA 20K022PJM65**

### Description

Our 2021 Doe consignment to the Superior Genetics Online Sale is PJM High Regard/ Legacy K22. She is the combination of multiple families of extensively tested Kiko Genetics. Her sire - MRG High Regard - was tested at the WVU Buck Test and his excellent performance is laid out on our Sire Page here at [PJMGoats.com](http://PJMGoats.com) High Regard was out of a matriarch doe from the MRG herd - Georgia Peach! K22's dam is a daughter of MJ1 RC's Blue Legacy - who we had at our farm and where he sired

excellent performers at the WVU Buck Test and a buck which also went through the last Western Maryland Test. K22 grew extremely well and is currently (2 14 21) 95.4 pounds. As her picture shows, she has an extremely dark FAMACHA - a 1 in my opinion. She has 2 teats - as pictured.
