

Sale Name: 2022 Superior Genetics Annual Online Kiko Sale

LOT 28 - MRG GT - 2 Straws

Description

2 straws semen MRG GT - 100% NZ son of HEMI and grandson of Terminator XX by a Keeper daughter, combining the best growth and parasite resistance genetics. MRG GT was the first ever Elite Registered goat in the IKGA. He is triple registered and DNA with the AKGA, NKR, and IKGA. Keeper was my original favorite Kiko buck and MRG GT has the length and loin that I've only witnessed in person in him and Keeper. Has also has width and depth like I witnessed in Terminator XX. This buck has it all and passes it onto his off-spring. His full sisters are our favorite does in our herd. They all have high tight udders with clean, small 1 + 1 teets. MRG GT weighed in at 290lbs in his prime without over-conditioning. and passing on his phenotype to his offspring. His kids have had the highest ranking in our kid crops here on the farm in past years and he has also had Top 10 finishing bucks on the WV Buck Test. MRG GT passed away in the Summer

of '21 at the age of 11 and held his condition until the end. Single MRG GT semen straws have been split and used on 2 does by our previous customers. The veterinarian who collected him originally stated that it was the highest mobility semen he had ever seen post thawing. Straws are available at our veterinarian's office in PA or at Flatrock in OK. They can be taken to REI at no extra charge.

Quantity: 1
