

Sale Name: 2022 Superior Genetics Annual Online Kiko Sale

LOT 1 - Flush Breeding - TMK Crush's 0041

Description

Let's start off the 4th Annually Superior Genetics 2022 sale with something interesting, a flush breeding. Here is how Lot 1 works: TMK Crush's Sally - the doe pictured & in video - is a daughter of Carpe Deim(AKA Crush). She is one of very few living "Crush" daughters. "Crush" is the sire of Mr. Speckles 81 who has sired many high performing test bucks. She is a very very well balanced and flashy doe. She is heads up and catches your eye every time you are in the pen. She is scheduled to be flushed on August 31st 2022. The winner of Lot 1 will send Ron & Christian McGill the semen of their choice for the flush & receive all embryos collected. The embryos will be frozen and shipped to you to put in as you please. The embryo flush will take place at Stock Vets Clinic in Rensselaer Indiana by Chris Rumsey. In our opinion Chris is one of best reproductive veterinarians in the US for small ruminants. Ron & Christian McGill will do all the programming & leg work. Winner of lot 1 covers flush & medical expenses of roughly \$500 dollars + \$35 per frozen embryo. Winner covers expenses to ship their semen to StockVets and ship frozen embryos after flush. This is a opportunity to create you own unique breeding with a rare genetic and well put together doe. Flushing comes with risks and rewards of receiving several(maybe 10-15) kids that could lay the foundation of your herd. Please don't hesitate to text or call Christian McGill with further questions. 317-376-0951
